

THE GLOBAL GOALS

# JOURNEY TOWARDS REACHING THE SUSTAINABLE DEVELOPMENT GOALS

## #3 Good Health and Well-Being

CALEC's dedication to promoting bilingualism is not only aimed at achieving socioeconomic improvements. Bilingualism has been shown to improve and enhance cognitive function in both children and adults.

## #4 Quality Education

Since its launch, CALEC has worked towards developing and implementing education programs that promote multilingualism and cross-cultural understanding. At CALEC, we aim to establish an inclusive and equitable quality education, including internship and leadership training.

## #10 Reduced Inequalities

With the help of our publishing company, TBR Books, CALEC has successfully published and distributed resources, including research papers, books, and case studies that seek to empower and promote the social, economic and political inclusion of all, with a focus on language education and cultural diversity, equity and inclusion.

## #11 Sustainable Cities and Communities

CALEC aims to help build sustainable cities and communities and support teachers, authors, researchers, and families in the advancement of multilingualism and cross-cultural understanding through collaborative tools for linguistic communities.

## #17 Partnership for the Goals

CALEC works to foster strong global partnerships and cooperation, and mobilize resources across borders, to participate in events that promote language education through knowledge sharing and coaching, empowering parents and teachers, and building multilingual societies.
