PRAISES

In the ever-evolving tapestry of global interaction, *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* is a pivotal exploration of the intersection between language, culture, and professional success. It unravels how multilingualism extends beyond mere communication while unlocking diverse cultural perspectives and fostering international collaboration. This work is essential for professionals and academics, offering a comprehensive understanding of the indispensable role of linguistic and cultural skills in today's world.

– Professor Teboho Moja, New York University and University of South Africa

With artificial intelligence now doing our translations easily and virtual meetings in English giving a superficial – and wrong – impression that we are all similar, it has never been so tempting to avoid language learning. *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* makes a compelling and timely case for the importance of language beyond the immediate practical needs of communication as a gateway to a more profound sensitivity to culture. The book takes us on a stimulating journey to explore different perspectives on how language ability and cultural fluency are complementary skills to improve our understanding of our international partners. This understanding is the precondition to integrating across differences, turning those differences into professional opportunities, and countering the divisive tendencies of our times. A thought-provoking and important book.

– Claudia Mueller, Affiliate Professor for Intercultural Leadership, ESCP Business School

Navigating the intricacies of our globalized society requires more than just linguistic ability; it demands a deep cultural understanding. *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* masterfully captures this essence, exploring how multilingualism and cultural acumen shape the modern professional landscape. This book is an invaluable resource for anyone seeking to comprehend the multifaceted role of language and culture in our increasingly interconnected world.

– Dr. Jane Flatau Ross, International Educator and Author of *Two Centuries of French Education in New York*

Speaking the World: Multilingualism and Cultural Fluency in the Professional World is a beacon in exploring global communication and cultural dynamics. It delves into the heart and shapes our understanding of the world and how cultural fluency becomes a bridge to new opportunities in the professional sphere. This book is not just an academic achievement; it is a crucial guide for navigating the rich tapestry of our global society.

– Darcey H. Hale, Former Head of School, The International School of Boston

We live in a time defined by global interconnectedness. *Speaking the World* stands out as an essential guide for navigating the complexities of today's international landscape. This book masterfully highlights the importance of multilingual communication and cross-cultural understanding as critical assets in our global economy. Insightful analysis and practical recommendations highlight how the journey toward cultivating these competencies must begin early, extending beyond the classroom to include rich, immersive cultural experiences, ultimately contributing to building a better world. Multilingualism and cultural competencies are no longer luxuries for the well-traveled; they are essential for our survival as a species.

– Noumane Rahouti, Ph.D., Lecturer at Sultan Qaboos University

Born and educated in Germany, I moved to France over a decade ago to start working as a professor of Entrepreneurship at a French business school. When my children were quite young, I developed a deep interest in how learning languages and new cultures impact kids and young adults. *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* is an invaluable resource, addressing many of my questions and prompting me to consider new ones. Chapters 3 and 11, which explore multilingualism's intersection with neurodiversity and artificial intelligence, are particularly insightful. I highly recommend this book and hope it sparks widespread discussion, innovative ideas, and meaningful policy development in this vital area.

– Professor Martin Kupp, ESCP Business School

Speaking the World: Multilingualism and Cultural Fluency in the Professional World is a compelling “call to action” on the imperative of multilingualism in our increasingly interconnected global landscape. Almost 50 years since Edward Said’s seminal work *Orientalism* critically examined Western perceptions of non-Western cultures, this volume adeptly navigates us through the complexities of cultural competence in the face of rapid globalization. Using a broad and impressive body of evidence on the benefits of multilingualism, the authors present a cogent argument for reevaluating our approach to education, multiculturalism, and the intricate interplay of language and culture in daily life. This work not only challenges readers to develop multilingual proficiencies but also advocates for their application in fostering cross-cultural dialogue and collaboration. It stands as an essential contribution to the discourse on global communication and understanding. I, for one, say thank you, merci, zikomo.

– John William Bray, Educator, Director of Learning,
iArticulate

Brilliant and a must-read! *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* is indeed a masterclass for anyone seeking to understand and navigate the complexities of our globalized economy. It is a revolutionary guide for entrepreneurs and professionals to develop the critical assets of multilingual communication and cross-cultural understanding.

– Ashish Jaiswal, DPhil (University of Oxford), educationist and author of *Visionary Thinking*

Although I arrived “late” to international education, in the past decade, I have been fortunate to experience firsthand, across contexts and continents, how learning and communicating through more than one language shapes children's developing understanding of, connections to, and engagement in the world. *Speaking the World: Multilingualism and Cultural Fluency in the Professional World* provides invaluable insights from varied disciplines and regions into how language acts as a bridge for building intercultural competence. Its critical and richly-referenced exploration of global competencies and bilingual education offers essential guidance for educators (and parents) preparing young people who will become global leaders and professionals to act on and thrive in an undeniably interconnected world. This collection offers compelling reading for anyone committed to helping develop the next generation of culturally fluent global citizens.

– Shelley Paul, Founder & Lead Consultant, Second Circle

ACKNOWLEDGEMENT

As we bring to fruition the comprehensive work *Speaking the World: Multilingualism and Cultural Fluency in the Professional World*, we are filled with deep gratitude and a profound appreciation for the myriad of individuals and groups who have contributed to this endeavor.

First, we thank every author who shared their insights, research, and experiences in this volume: Sergio Adrada-Rafael, Dina Rosa Agyemang, Gaspard Belhadj, Françoise Bougaeff, Laurence Champomier, Victorien Coquery, Fatou Alhya Diagne, Megan Diercks, Gabrielle Durana, Lama Fakih, Isabelle Finger, Tobeckukwu Precious Friday, Michele Gerring, Eric Hertzler, Md. 10 Years of The Word of the Month, A Celebration by Andrew Arnon, Benjamin Levy, Jim Sheppard (Bilingual: English-French)

Published monthly since 2010, The Word of the Month is a short, irreverent focus on words and terms in the headlines. The format combines original artwork along with words, definitions, examples and expressions from members of the Gymglish creative team. Each monthly entry is translated into French though the goal is to amuse and educate the reader with accessible, practical, modern English.

The Word of the Month appears on its own website: thewordofthemonth.com, as well as in partnership with LeMonde.fr.

The lead author of Gymglish's creative content, Andrew Arnon contributes voices, ideas, scripts and pedagogical content to Gymglish's language courses. Ben Lévy co-founded Gymglish with one reasonable goal in mind: to have fun daily. With a background in teaching and originally from England, Jim Sheppard is the principal illustrator behind the cartoons of the Word of the Month.
